Mr. Ralph Avallone, President
International Green Energy Council
1701 Pennsylvania Avenue, NW
Suite 300
Washington, DC 20006

Dear Mr. Avallone,

Thank you so much for your presentation to our school board in December 2008 as well as our meeting on August 7, 2009 with yourself, Mr. Inzelbuch, Mr. Ostreicher and a representative from RAI Solar. We believe that there are true opportunities for the future of our school district in regards to solar energy applications. The additional opportunities of using these solar applications as a possible educational medium is even more exciting.

Please accept this letter as a formal Letter of Intent for our school district's commitment to move forward with the National Green Energy Council to assist us to find the right partners for us to achieve the goals of educating our students about energy efficiency, environmental stewardship and renewable energy as well as a way to open up doors for our vocational classes to have hands on training through the applications of solar energy on our schools through your Green Jobs Corps™ program.

Finally, the opportunities that your organization has brought to our district in regards to utilizing a power partner to install solar energy in our schools and addressing the roof replacement hardships at the same time is very exciting. All this while not costing our school district another expense that we could not afford on our own or without a referendum to the tax payers whom which are already overburdened.

Please keep in mind that only the Board of Education must approve this Letter of Intent which will be included for action on the August 25, 2009 board meeting agenda.

We look forward to working together on all of these areas.

Sincerely,

A handwritten signature in black ink, appearing to read "Robert S. Finger", written over a horizontal line.

Robert S. Finger
Business Administrator/Board Secretary
