

Mr. Ralph Avallone, President  
International Green Energy Council  
1700 Pennsylvania Ave. NW  
Suite 400  
Washington, D.C. 20006

May 29, 2008

Dear Mr. Avallone:

I wanted to thank you again for speaking at New Jersey Institute of Technology on April 16, 2008. Your presentation about the many wonderful initiatives of the International Green Energy Council was informative and inspiring to me and many of our students. I appreciate your sharing your vast knowledge of sustainable practices locally, nationally and internationally regarding energy usage, building practices and changing individual behaviors. It was truly a pleasure to work with you and your organization. I appreciate your enthusiasm, professionalism and flexibility in arranging your visit to NJIT.

We are very excited to be offered the opportunity to establish the first college chapter of the IGEC at NJIT for fall 2008. The students involved with our organization SCEED: Students Concerned with Efficient Environmental Design, are very excited about organizing this chapter and working with you on future endeavors. I believe this new partnership with you and the IGEC will benefit our entire campus community. My hope is that the knowledge and experiences gained by our students by working with the IGEC and your many global initiatives will in turn benefit the greater community.

Sincerely,

Donna Minnich Spuhler  
Director, NJIT Campus Center
